# IT MANAGED SERVICES AND CLOUD INFRASTRUCTURE SUPPORT

CITY OF SAMPLE, ONTARIO · EST. $1.2M CAD OVER 5 YEARS · POSTED SEPT 10

CLOSES SEPT 26, 2:00 PM ET
**9 DAYS LEFT**

SAVE

OPEN THE FULL RFP ON MERX

## SUMMARY IN PLAIN LANGUAGE

- The City wants one vendor to run its help desk, network and cloud infrastructure for five years.
- Service levels are strict: 24/7 coverage, a 15-minute response on critical incidents, 99.9% uptime.
- Data stays in Canada, and the vendor must hold SOC 2 Type II or ISO 27001.
- Scored on technical approach (40), experience and references (25), price (25), team (10).

SUMMARIZED FROM 42 PAGES. READ THE ORIGINAL BEFORE YOU BID.

| Contract term | **5 years, 2 renewals** |
| Expected start | **January 2027** |
| Location of work | **On site and remote, Ontario** |
| Submission | **MERX, by 2:00 PM ET** |
| Questions close | **SEPT 19** |

## SCOPE IN BRIEF

- Tier 1 to 3 help desk for roughly 900 staff, 24 hours a day
- Network, server and endpoint management across 12 municipal sites
- Migration of the remaining on-premise workloads to a Canadian cloud region
- Backup, disaster recovery and quarterly security testing
- Asset inventory, patching and monthly service reporting

## YOUR FIT SCORE

**92** /100

**STRONG FIT**
WORTH BIDDING

| | |
|---|---|
| Category match | 38 / 40 |
| Location and eligibility | 19 / 20 |
| Contract size | 14 / 15 |
| Timeline and capacity | 12 / 15 |
| Credentials | 9 / 10 |

Scored on your questionnaire answers. Update them and this score changes.

## FIT ASSESSMENT

### IN YOUR FAVOUR

- Managed IT and cloud is your first category, and municipal is a buyer you named
- The contract size sits inside the range you gave
- You hold SOC 2 Type II, which is mandatory here

### GAPS TO CLOSE

- 24/7 coverage with a 15-minute critical response goes beyond the hours you listed
- They want three references of similar size and you listed two

### COULD RULE YOU OUT

- A performance bond is required and your answers say you have no bonding

## RAISE THIS SCORE

| | | |
|---|---|---|
| Add a third municipal or health IT reference | +4 | ADD |
| Confirm 24/7 support coverage | +3 | ANSWER |

PHASE 01 · SCREEN 01 OF 03

# ONBOARDING QUESTIONNAIRE

Five short steps that teach BeaverBids what the company does. Every answer becomes part of the score.

---

### WHAT'S ON THE SCREEN

- Five steps: company basics, what you do, where you work, size of work, credentials
- Ten procurement categories, from managed IT to construction, logistics and consulting
- Answers pre-filled from the company website, so users edit instead of type
- Buttons and checkboxes wherever possible, open text only once
- A panel showing how many points each step is worth

### WHY IT MATTERS

- The score is only as good as these answers, so this screen is the foundation
- Five minutes, no demo call and no sales form in the way
- Showing the weights gives users a reason to answer fully
- Scored tenders appear the moment the questionnaire is done

PHASE 01 · SCREEN 02 OF 03

# OPPORTUNITIES LIST

The daily home screen. Tenders from every Canadian portal, each scored against the questionnaire answers.

---

### WHAT'S ON THE SCREEN

- One feed from CanadaBuys, MERX, BC Bid, SEAO, NBON and Alberta Purchasing Connection
- A score out of 100 on every row, with a reason written from the user's own answers
- Red markers on the rows carrying a warning or a blocker
- Not a fit, Save and View on each row
- Filters for category, province, portal, minimum score and closing date

### WHY IT MATTERS

- Replaces checking eight or more portals by hand every day
- The list can be cleared in two minutes instead of read notice by notice
- Tying each reason to the user's answers makes the score feel fair, not a black box
- Saving and hiding teaches the system what this company actually wants

PHASE 01 · SCREEN 03 OF 03

# LISTING DETAIL

Everything needed for a bid or bin decision on one page, then a direct link to the original RFP.

---

### WHAT'S ON THE SCREEN

- Plain-language summary of the tender in four points
- About the buyer: who they are, how often they post, what they usually spend
- About the job: type, term, start date, location, how to submit, question deadline
- Fit score out of 100 with all five factors shown
- Fit assessment in words: in your favour, gaps to close, could rule you out
- Documents and a link to the tender on its source portal

### WHY IT MATTERS

- Saves reading 42 pages to find out a tender was never a fit
- The written assessment is what users forward to a colleague
- Deal-breakers such as a performance bond surface before any time is spent
- Links back to the questionnaire, so a wrong score is easy to correct
- Sends users to the official portal to bid, which keeps phase 1 small
